Engineering Heritage Australia

John Monash Medal 2012

presented to

Mr Ian Maitland

FIEAust CPEng

for

his outstanding contribution to engineering heritage through a long career of building conservation projects undertaken by his structural engineering consultancy and his extensive voluntary heritage advice to community organisations. Founding a firm in Perth which specialises in heritage work, he has undertaken more than 150 engineering heritage projects and conserved a wide range of iconic city buildings through to industrial structures, private dwellings and historic ruins. His work has received the high acclaim of clients and the recognition of government, professional and industry associations which have bestowed many awards. As a registered Heritage and Conservation Engineer, Ian sets an example to the engineering profession and provides valued support to the heritage conservation community.
